Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:

Step 2: Domain Choice
What domain did you choose to fine-tune the Meta Llama 2 7B model on?
Choices:
  1. Financial
  2. Healthcare
  3. IT
	3.IT

Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the **model_evaluation.ipynb file**?	We discuss the issues of data management for ubiquitous computing in the context of (i) data acquisition, (ii) data analysis, and (iii) data presentation. We also present a set of challenges and open problems. AB - Ubiquitous computing is a new computing paradigm
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the **model_finetuning.ipynb file**?	because ubiquitous computing is intended to > [{'generated_text': ' be ubiquitous.\nThis is the first of a series of articles that will explore the implications of ubiquitous computing, its benefits and its risks.\nI'm going to start by looking at the social implications of ubiquitous computing, and what they mean for us.'}]
